DESCRIPTION

A trailer with excellent traction properties. Ready for heavy duty in even the most demanding conditions. TA-NO special trailers are the best choice whenever availability is the key. And if you add our service solutions to this, you are provided with everything you need to deal with the task at hand, under any conditions.

This flexible trailer used for transport of construction materials will be a delight to even the most demanding users. Its novel, technical solutions are inspired by sublimed needs of the users. Everything is well-thought, harmonious and ergonomic.

TECHNICAL SOLUTIONS

Full-sized spare wheel installed horizontally on the drawbar does not hamper the access to the digger.

Automatic supporting wheel ensures stable trailer parking.
Platforms integrated with mudguards. Provided with anti-slip surfaces.
They facilitate access to the transported machine.

Sliding beam limits the entry. Facilitates correct machine placement for transport purposes.
Transport belts installation openings are located both in the floor and in the sides.
They ensure easier and more reliable vehicle security during the transport.

Loading platforms integrated with stabilisers.
They can slide to the sides and facilitate installation of a loading ramp.
Assembly console for a digger bucket. Profiled surface provides improved support.
