DESCRIPTION

A trailer with excellent traction properties. Ready for heavy duty in even the most demanding conditions. **TA-NO Autotransporters** is the best choice whenever availability is the key. And if you add our service solutions to this, you are provided with everything you need to deal with the task at hand, under any conditions. This flexible **trailer used for vehicle transport** will be a delight to even the most demanding users. Its novel, technical solutions are inspired by sublimed needs of the users. Everything is well-thought, harmonious and ergonomic. The lighting bar automatically folded when the trailer is being folded is a unique solution for this type of design.

The loading angle is only 10 degrees.

TECHNICAL SOLUTIONS

An **electric winch** with a remote control system and a sliding side system facilitates loading of damaged vehicle.

The **lighting beam** folded during loading ensures the simplest operation of the trailer. **LED 12/24V lighting**.

The **manual pump** ensures emergency operation of the trailer, also during power outage within the trailer systems.

Transport belts installation openings are located both in the floor and in the sides. They ensure easier and more reliable vehicle security during the transport.

The power supply source is protected against weather conditions and is provided with the function of **battery charging** both directly from the hauling vehicle and from an external source.

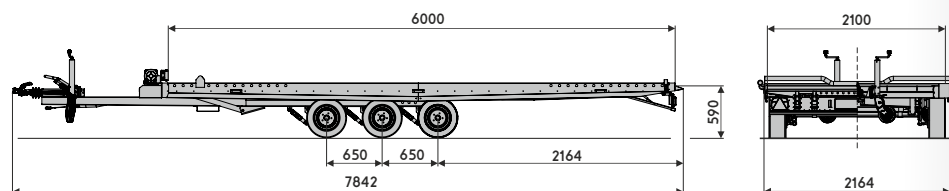

The transporting platform is made of **aluminium floor panels** with anti-slip surface.

AVAILABLE EQUIPMENT

- Spare wheel
- Alloy rims
- Shock absorbers
- Plastic wheel chock
- Multi-LED lamps
- Protective cover for lamps
- Lashing straps
